Do You Know?

MACLURA POMIFERA **(Osage Orange)**

The landscaping value of the Osage-orange lies in its remarkable ability to stand poor soils, extreme climates, and full exposure to strong winds. It's a low-branching round headed, compact tree with upright branches. The bark is light brown and rough. Its lustrous bright green leaves turn yellow before dropping in the fall. Bears round, hard fruit, 5 to 6 inches in diameter, green at first, and a bright orange when mature. The fruit is not edible.

Minimum temperature endurance: Minus 10°F.

2¼" pots @ .20 ea.

COTONEASTER WARDI

Attractive silver-gray foliage with a white cast on the underside of the leaves making a delightful setting for its orange-red berries on long arching branches. Showy orange scarlet foliage in the fall with cool weather. Blends well in any landscape.

Minimum temperature endurance: Minus 5°F.

2¼" pots @ .20 1-gal. @ .60

SAPIUM SEBIFERUM **(Chinese Tallow Tree)**

The rich, broad foliage, slender classically shaped trunk and graceful branches of this tree make it a winner in shade tree competition. It grows rapidly to just the desirable size for plenty of shade and is suitable for either front or back yard planting. The wax covering of the seed is used for making candles and soap in China. It's a quick seller from appearance and its performance will make new friends for your nursery.

Minimum temperature endurance: Plus 5°F.

2¼" pots @ .25 1-gal. @ .75

SARCOCOCCA RUSCIFOLIA **(Fragrant Sarcococca)**

A lustrous green leaved evergreen shrub, suitable for planting in either light or deep shade. Produces small white fragrant flowers followed by dark scarlet berries ¼" in diameter.

Minimum temperature endurance: Plus 5°F.

2¼" pots @ .18 1-gal. @ .50 5-gal. @ 1.85

THIS IS YOUR SHIPPING COST GUIDE FOR LINERS (2¼" & 3" Pots)

By checking this guide along with the catalog prices, you can figure approximately how much a liner will cost laid down in your area. These rates are the most that you would have to pay; in some cities the rates are lower than in the state in which the city is located.

For example, the laid down price for *Berberis thun. atropurpurea* to any area in Michigan would be 18c for each 2¼" pot size size plant. The laid down price for *Viburnum burkwoodi* to any area in Texas would be 22c for each 2¼" pot size plant and 39c for each 3" pot size plant.

(These rates apply only to stock shipped by public carrier. [Railway express or Motor Freight.] If your orders are being delivered by our truck, please disregard this information.)
